

SEP 14: Dynamic Asset Metadata (created 30/9/2018)

- This SEP extends SEP-0001 and adds the support of the dynamic asset metadata resolution.
- Creates the ability for Anchor or issuing wallet to mint 1000's of assets.
- Example is Deloitte's ATOM machine (quantum tracing system), private ledger, automated asset minting.
- Allows for the entire financial market to come to Stellar without ICOs
